Parish Nursing Standards for Practice 2015

Standard #1 Professional Practice and Accountability

The Parish Nurse upholds the attributes of the profession through an ongoing commitment to responsible and accountable parish nursing practice. Each parish nurse is accountable to the individuals, families and the faith community she/he serves. She/he is responsible for the quality and impact of the care provided, and for maintaining professional competence and continuing education.

Standard #2- Wholistic Nursing Care and Health Promotion

Each parish nurse views the individual as a unified whole of body, mind and spirit and considers spiritual care as central to the practice of parish nursing

Ins pursuing optimal health, the parish nurse recognises that faith and health are clearly linked, and that psychosocial and spiritual care are integral to promoting wholistic wellness. The parish nurse utilizes specific nursing strategies for promoting health with individuals, groups, families, the faith community and the larger community.

Standard #3- Facilitation of Spiritual Care

Each parish nurse associates spiritual beliefs and practices with all aspects of an individual's life and health. The parish nurse uses specific nursing interventions to provided spiritual care.

Standard #4- Communication and Collaboration

Parish Nurses communicate and collaborate within the structure and administration of the faith community to strengthen the capacity for health, healing and wholeness. Parish nurses create collaborative relationships and partnerships that connect individuals and foster healthy communication.

Standard #5- Advocacy and Ethics

Maintaining respect for ethical, cultural and sexual diversity and individual choice, values and beliefs, the Parish Nurse supports and assists with access to relevant information, resources, health system and social services.

Treating all persons with respect and dignity, the Parish Nurse identifies vulnerable persons and/ or populations and advocates for systemic and social change that increased community responsiveness.

Standard #6- Research and Evidence Informed Practice

The parish Nurse participates in and / or supports research activities that will strengthen and validate parish nursing practice. Within the context and preferences of the faith community, the parish Nurse will integrate evidence informed knowledge into hi/ her practice.¹
